One of the great books

By The Reviewer Formerly Known as Kurt Johnson

In this monumental work, Barry Cunliffe (Professor of European Archaeology at Oxford) traces the history of those living along the Atlantic coast of Europe. Beginning in 8000 BC, he traces the material culture of peoples spread from Spain through the British Isles, and on to the southern coast of the North Sea. The histories of other peoples and lands are covered as they impact the peoples of the Atlantic coast. Maintaining that the covered people shared a common culture, he covers everything known about them in a methodic, and extremely in-depth manner.

There are some books that are good, and some that are very good, and then there are books that just knock your socks off--this book is one of the latter. Professor Cunliffe covers the history of an extensive area with a depth of information that would seem to require a book at least five times the length. In fact, if I have one complaint against this book, it is that it contains so much information on topics that are not within the sphere of my interest. This means, that if you are interested in the history of these lands, from 8000 BC to AD 1500, then this book is for you!

I must add that this book is wonderful in its production, including many maps and colorful pictures. In a way, this book has the feel of a textbook, but it is neither dry nor incomprehensibly academic. If you are interested in the possibility of advanced prehistoric civilizations, this book contains nothing in that direction. However, the depth of the analysis it does provide on archaeology makes it a wonderful resource for checking claims by other authors. This is a great book that you should consider buying.
