Good to excellent content - terrible publishing policy

By [awegweiser@edinboro.edu](mailto:awegweiser@edinboro.edu)

Lewis (Not "Flewis") wrote a decent text a number of years ago. It was then expanded to a companion volume (Analytical Sedimentology) with another author. The two nicely complement each other but the mind boggles at a price of almost \$100 per each. The publisher has clearly made little effort to control the cost. Redundancy between the two volumes is excessive, hard cover rather than soft is used and, indeed, both could easily have been combined in one less pricey volume. A valuable resource to students and professionals has therefore been compromised by publisher, author or both due to ignorance, greed or stupidity. A terrible shame!
