From the Inside Flap

"Come, sit," he says, his fingers curling gently around the tips of mine.

I plop down on the beanbag beside him and yelp.

"You are hurt." He frowns. "Let me take a look."

He scrunches the edge of my shirt, but I clamp down on his hand. There's no way I'm admitting that it's my butt that's sore, and no way am I ready to let him inspect that part of my anatomy. Yet.

Get you, my inner devil teases.

"I'm fine." I pin him with a "drop it" look.

"You are so stubborn." Shaking his head, he unscrews the cap from his bottle.

"I'm stubborn?" I level an incredulous look his way. "Have you not looked in the mirror recently, dude?"

He laughs and the sound sends warmth flooding through me.

"You've a lovely laugh," I blurt out. Ohmigod! I can't believe I said something so cheesy.

"I do?" He looks amused.

"Yep." I'm resorting to one-word replies now for fear of what else might inadvertently tumble out of my mouth.

He stares intently at me, his fiery eyes penetrating my soul. The cord buzzes with anticipation. I might've forgotten how to breathe again. "You are beautiful, through and through."

With each passing second, my heart pounds faster and faster. He inclines toward me and I move closer. Butterflies are throwing a mad party in the pit of my stomach. Like magnets, we inch closer and closer still. As my pulse throbs, he zeroes in on my lips and his eyes linger there.

I've imagined this moment so many times without ever really believing I'd get to experience it. Now that I'm here, seconds away from my first real kiss, I'm terrified of the strength of my emotion. I never knew it could be like this. That I could feel such a strong connection to a boy; that my body could tremble with such intense desire. And our lips haven't even met yet.

We are a hairsbreadth from one another. I bridge the final distance and close my eyes. His fingers brush my lips and I'm tingly all over. Reopening my eyes, I see the adoration glistening in his gaze. For me.

"Ala beatra." The words roll seductively and respectfully off his tongue.

I've no idea what it means, or what language he's speaking, but it sounds beautiful.

And like a form of worship.

Though it's possible I'm deluding myself.

He closes his eyes and presses his mouth to mine. His touch is feather soft and it unravels me. I kiss him back equally gently and he moans softly. His lips exert more pressure as he draws me in flush with his solid chest. I've never felt this much emotion before. It's almost too much, but at the same time, not enough.

Gaining in confidence, I encircle my arms around his neck and melt into him, savoring the feel of his body as it presses against mine. Angling his head, he extends the kiss, and it grows in intensity and fire. I'm matching him, kiss for kiss, and my need for him is reaching an all-time high. I can't get enough of him. He is everywhere, and yet I need more.

How can I give him my heart when his race plans on taking my future?

Despised by her family and betrayed by an unscrupulous government, Sadie dreams of a different life. When she is chosen to participate in the government's new social experiment, she is ecstatic at the prospect of spending six months in Thalassic City, the shiny new city under the sea.

Immediately drawn to Logan Chandler, Sadie is captivated by the beautiful boy with the ocean-blue eyes. Logan seems to embody everything that has been forbidden, but he isn't all he appears to be.

Confused over Logan's true intentions and concerned when best friend Jenna starts transforming in front of her eyes, Sadie partners with newcomer Jarod in a bid to uncover the government's real agenda. The truth is more shocking than anything she could ever have imagined.

When Sadie finally understands why the Saven walk among us, will it be too late to save her heart and the human race?

Hooked on Siobhan Davis writing....

By cc

Hi began reading this author with her Tru Calling series. I love the young adult romance but not necessarily the sci-fi theme. Siobhan has made me a lover of that now.

I did find it difficult in the very beginning of the book to follow, just because there was world building, character building, but I had no idea why the world was the way it was. However, I feel that that worked in my favor because it allowed me to be surprised as the plot developed. Once that happened, I finished the book in a very short period of time, I just couldn't put it down! The writing is so well-done that it transports you to that world, putting you in place of the characters. It's truly captivating and extremely enjoyable, and

leaves you wanting more.

I fell in love with Sadie, and even watched her character developed into somebody stronger during the story, and this is just the first book! While I'm very interested in her and Logan and how the relationship will develop, I also find myself invested in secondary characters, and that doesn't happen often in a book. These characters paid such intricate rolls and woven so well with your main characters that it's almost like a second story within the story.

The romance is sweet, has its own ups and downs, but romance is always my favorite part of the book and I got plenty in Saven Deception. I embraced the Eterno connection. It makes the romance more intense! However, romance isn't all this book is about. There is corrupt governments, aliens living among them without knowing, mystery and intrigue and keeps you wondering what is going to happen next.

I love that Siobhan does not leave her books with huge cliffhangers. I will come back and read any additional books in the series if the series is written well. I'm not a big fan of cliffhangers that leave you waiting with characters hanging in the balance. I also appreciate that I do not have to wait for a year to find out what's going on in the story. This makes to Siobhan one of my favorite writers , not just because her books are wonderful and creative and romantic but also because she respects her readers enough to work hard on getting her books out in a reasonable amount of time.

I'm very excited about seeing what happens in the second book, and how these characters continue to develop and change their world with the surprises, and plot twists I can't begin to imagine what will happen next . I give my highest recommendation, not only the Saven series, but the Tru Calling series. If you haven't read that series yet, I suggest you buy that now and read it while you're waiting on the next book to come out in the series. You won't be disappointed!

Excellent read! I'm not really into the alien thing but thought I'd give it a shot. I fell in love with the characters and the story line was REALLY good! It had just the right amount of romance without the lovers triangle to irritate me! :) Very imaginative without any amateurish feels. Now, Imagine my surprise when I downloaded the next 3 books and after finishing the first, I went to the second and was sorely disappointed when the characters changed on me and shifters were added to the mix. Oh my confused mind. After backing out and checking out my home screen I realized I purchased the seven series and not the Saven series.... Hrmph.... So then I was truly disappointed to find there are not more books out on this series yet. I have to wait.. I'm not the most patient of readers :)~.

I am hooked!

By D.C.

I have been a fan of X-Files since it first aired on television, and this book is right along those lines. I also loved Siobhan's True Calling series. It constantly had me guessing and creating ideas (some completely ridiculous) of what was going to happen, and I found myself doing the same thing while reading this. I kept finding myself going back and forth about the aliens, and I hate to admit it, but I am not as big a fan of Logan as I think I am supposed to be. I don't see their relationship being much different than Jen and Dante's. I understand that it is a soul mate thing, but Logan is going to have to build my trust throughout the next book. As with the True Calling series, I find myself rooting for the underdog--Jarod/Watson (not sure of his real name). I find him incredibly charming and endearing. He is so passionate about destroying the corrupt government while being tech savvy and highly intelligent. I would love to meet a guy that has a costume

department in his home! Going on undercover missions would be so much fun, and I see him being more compatible with Sadie. However, there was the scene where Jarod says he liked Jenna, but I am not buying it. He saved Sadie first, and I think there is something going on there, or maybe I am just suffering from wishful thinking. Even though I am not on the Logan bandwagon yet, I still absolutely loved the story. I am so excited to see what happens next!!
