Experience the story of a lifetime

When you want to truly get to know a person, dates and facts about their life will only tell you so much. You need to look at the stories that define that person's life, as well as their individual traits and characteristics, as defined by human nature and culture.

When it comes to studying personality, the larger story matters most of all. In *The Person: An Integrated Introduction to Personality Psychology*, Fourth Edition, Dan McAdams presents a bold and integrative vision for personality psychology that puts many different ideas into a meaningful structure. With this text, you can understand the larger story, and discover how powerful and useful studying personality psychology is today.

The text begins with fundamental evolutionary, social, and cultural contexts for understanding personality, followed by an examination of the three different levels of an individual's personality:

- Dispositional traits, a person's general tendencies.
- Characteristic adaptations, a person's desires, beliefs, concerns, and coping mechanisms.
- Life stories, the stories that give a life a sense of unity, meaning, and purpose.

Key Features:

- New streamlined paperback format.
- Updated with recent research findings to engage professors and students alike.
- Presents a clear unifying vision for the field of personality psychology.
- Brings together the best from traditional personality theories and contemporary research.
- Addresses the most important questions that people can ask about their own lives and about human life in

general.

McAdams](#) web link that can be downloaded directly. So, it will not require more times or even days to pose it and various other books.

THE PERSON: AN INTRODUCTION TO THE SCIENCE OF PERSONALITY PSYCHOLOGY BY DAN P. MCADAMS PDF

The Person provides psychologists with an organizational scheme for personality psychology. This sets the study of the person into evolutionary and cultural context and divided personality up into three broad areas: dispositional traits, characteristic adaptations, and integrative life stories. The fifth edition has been updated to reflect advances that have occurred in the field of psychology in the past few years. It presents new findings that have been obtained with respect to the correlates of personality traits, the dynamics of motives and goals in human lives, and the meanings and manifestations of life stories. Discussions are included on the new ideas on evolution and morality as well as the role of culture in personality. Psychologists will also find a much stronger and detailed discussion of psychophysiology of extraversion, neuroticism, and the train of sensation-seeking.

GET TO THE POINT ALREADY!!! OH BROTHER!!!

By MoonFace

This text book is a joke! I study psychology, and personality is a very interesting aspect of the discipline. The writer of this book is too wordy. You will spend so much time reading about one subject, and they repeat the same point OVER and OVER. I want it fast and easy. I don't have all the time in the world.

If there is an aspect of personality that interests you, just go directly to the source. The book deals with a variety of topics, from evolutionary psychology, big five traits, psycho-social development and psychoanalytic psychology. I'm sure you are bound to find something that won't waste your time. I like my books to get right to the point.

SAVE MONEY AND BUY OLDER EDITIONS!!! If you find a textbook you want, go back a few editions until you can find it for under 10 dollars. Most of the time, new editions are just a scam to keep the price up!!! I do this with so many medical and pharmacology texts so that I don't waste hundreds of dollars. The material is basically the same. The only difference is new research that could recommend new techniques or uses for drugs isn't there. But you can always look that up online or in a scholarly journal. I mean, someone who graduated with a M.D. or PhD ended their education with that book, so you're not the only one a little behind. Save money and buy older editions.

Doesn't make the subject interesting to me.

By Mary

I had to get this book for my online college course. The reason I cannot stand reading it is because the print is SO SMALL. if it wasn't for that, I would have given it 3 stars.

I also don't think it is a very well written book where one can easily understand the concepts.

Hard to read

By alfa

Dreadful book for a fun class. Never opened and never read because it's just so overwhelming. Hate the layout of the book and hate how it reads so I just never used it. If you're taking a class for personality, just pay attention to your teacher! :)
